Quranic Arabic Fonts

A practical survey of Quran-specific typefaces, Quran-compatible Arabic fonts, and downloadable font collections

What this catalogue covers

This survey brings together named fonts and font systems from official Quran-publishing sources, Quran Foundation documentation, specialist font directories, and established Arabic font projects. “Location” means the source or download page; the links in the PDF are clickable.

Scope note

There is no single canonical global registry of every Quranic font. One specialist directory currently reports 49 Quranic font entries and another reports 27 fonts across Quran scripts and layouts. Some entries are legacy or archive records, and some have no clearly documented licence. This report lists the named fonts and systems that could be verified from the sources below; it should be treated as a researched survey, not a guarantee that no other regional or private font exists.

The most useful distinction: Unicode fonts vs. page-glyph fonts

Unicode text fonts behave like ordinary fonts: the Quran text is encoded as Arabic Unicode, and a single font file can render a verse or document. Examples include KFGQPC Uthmanic Hafs, Amiri Quran, Me Quran, PDMS Saleem and compatible IndoPak Nastaleeq.

Page-glyph (QCF) fonts are different. Their special glyphs represent Quran words in a fixed page layout. QCF V1, V2 and V4 are delivered as 604 page-specific font files and require matching glyph-coded text and page data. Installing the font alone will not make ordinary Arabic text render correctly.

Quick starting points

- General Madani Hafs text: KFGQPC Uthmanic Hafs Unicode (V18).
- Exact Madani printed-page layout: QCF V2, using matching code_v2 and page number.
- Tajweed-coloured page rendering: QCF V4, with compatible colour-font support.
- South Asian / Bangladesh-style Quran layout: the compatible IndoPak Nastaleeq font and matching text; do not substitute a random Nastaleeq font.

Research date: 9 November 2026 | Prepared as a reference index, not a font binary distribution.

1. Quran text fonts - Unicode and single-file families

These are the most practical choices when the Quran text is stored as Unicode. “Naskh”, “Uthmanic” and “Nastaleeq” describe different script traditions; the visual result also depends on the text edition, harakat, pause signs and application shaping.

Font name	Script / type	Purpose / description	Location	Notes
KFGQPC Uthmanic Hafs (V18)	Unicode; Hafs / Uthmani Naskh	Single font for normal verse text; close to the King Fahd Madani script.	Quran Foundation CDN + setup guide	Recommended practical starting point. Direct file name: UthmanicHafs1Ver18. Check current rights/terms before redistribution.
KFGQPC Hafs (V22)	Unicode; newer Hafs revision	A newer KFGQPC-style Unicode face with tighter metrics and sharper joins.	JUZZ font comparison	Revision/source listing is community-hosted; compare against V18 before switching.
KFGQPC Uthman Taha Naskh	Unicode Naskh; Madani style	Digitized Uthman Taha Naskh used as a Quranic text face.	Font record / download	The directory describes free distribution; read the included README/licence.
KFGQPC Uthman Taha Naskh Bold	Bold Naskh	Bold companion for emphatic passages and headings.	Font record / download	A display/heading weight, not usually the default for long Quran passages.
KFGQPC Uthman Taha (Uthmanic)	Uthmanic Quranic face	Alternative Uthmanic-script listing in the community catalogue.	Quranic font directory	Directory listing; confirm exact file/version and licence on the download page.
KFGQPC Uthman Taha Bold (Uthmanic)	Bold Uthmanic	Bold companion to the Uthmanic-script face.	Quranic font directory	Directory listing; confirm exact file/version and licence.
IndoPak Nastaleeq Waqf-Lazim v4.2.1	IndoPak Nastaleeq; Hafs text field	South Asian Nastaleeq Quran text with the compatible waqf and verse-end signs.	Quran Foundation font guide	Use the matching font with text_indopak_nastaleeq. Generic Nastaleeq fonts may misrender waqf signs.
IndoPak Nastaleeq (Quran Fonts edition)	Unicode; IndoPak	Standalone downloadable IndoPak font bundle for Quran text previews.	Font download page	Do not assume this is byte-for-byte the same build as Quran Foundation v4.2.1.
Me Quran (Madani)	Unicode; Madani Uthmanic	Compact Madani-style face for verse-by-verse display.	Font download page	The Quran Fonts listing labels it non-commercial; check terms before commercial use.
Amiri Quran	Unicode; Quran-tuned Naskh	Amiri variant tuned for Quran typesetting; traditional book-style Naskh.	Amiri Quran font record	SIL Open Font License according to the font directory; the regular Amiri project page is a separate family reference.
Amiri Quran Colored	Unicode colour font; Quranic marks	Coloured OpenType face for recitation signs and traditional mushaf colour treatment.	Font record / download	SIL Open Font License 1.1 according to the font record; check OpenType colour support in target software.
Harmattan	Naskh; West African / Warsh-oriented	A traditional-style Arabic font designed for Arabic-script languages in West Africa.	SIL official download	SIL Open Font License. Not a page-faithful Madani Mushaf font; useful where its regional style is intended.
PDMS Saleem Quran Font	Unicode Quranic font; Pakistani style	Purpose-built Quran font with vowel marks (aeraab) and waqf symbols.	Pakdata / PDMS product page	Vendor page describes Quran-specific features. Check current distribution and commercial terms with Pakdata.
Scheherazade New	General Unicode Arabic Naskh	Broad Arabic-script coverage; supports many Quranic/Arabic characters and marks.	SIL official download	Not a dedicated Mushaf facsimile font. SIL Open Font License; excellent general Arabic coverage.
Bahij Uthman Taha	Quranic Naskh; Pashto additions	Quranic Naskh typeface based on Uthman Taha style.	Quranic font directory	Directory metadata says freeware, but the licence status has varied between listings; verify with rights-holder.

2. Additional Quranic and regional font entries - part 1

These entries are included because they are catalogued as Quranic fonts or specific recitation/script variants. The archive-listed fonts should be treated as “research leads” until the file, source and licence are checked.

Font name	Script / type	Purpose / description	Location	Notes
KFGQPC Uthmanic Script HAFS	Hafs; Uthmanic script	King Fahd Complex-associated Hafs font, also mirrored in the QPC repository.	QPC font repository	Use a known official or repository build. Avoid mixing V1/V2 glyph text with a mismatched font.
KFGQPC Hafs Nastaleeq	Hafs; Nastaleeq	Official Hafs Nastaleeq font page for the South Asian script tradition.	Official Hafs Nastaleeq page	Use with its matching Quran text and verify waqf/verse-end marks.
KFGQPC Qalun	Qalun riwaya	Official font/page entry for Quran reading in the Qalun narration.	Official Qalun font page	Riwaya-specific; do not substitute a Hafs text/font pairing.
KFGQPC al-Duri	al-Duri riwaya	Official font/page entry for Quran reading in the al-Duri narration.	Official al-Duri font page	Riwaya-specific; verify the associated text edition.
KFGQPC al-Susi	al-Susi riwaya	Official font/page entry for Quran reading in the al-Susi narration.	Official al-Susi font page	Riwaya-specific; verify the associated text edition.
KFGQPC Warsh Uthmanic Script	Warsh riwaya	A Warsh-specific Uthmanic-script font entry.	Official Warsh font page · Directory	Check the page for current download and riwaya-specific usage notes.
Almaghribi Warsh Quran	Maghribi / Warsh	Regional Warsh-style Quran typeface entry.	Quranic font directory	Archive entry; licence undocumented in the catalogue.
KFGQPC Shouba Uthmanic Script	Shu'bah riwaya	Script-specific Quranic font entry.	Official Shu'bah font page · Directory	Check the page for current download and riwaya-specific usage notes.
KFGQPC Ahsan Regular	Quranic Naskh/text	Ahsan series text face listed in the Quranic font catalogue.	Quranic font directory	Community listing; verify the file and licence before commercial publication.
KFGQPC KSA Regular	Kingdom series text face	Modern Kingdom-series Quranic/Arabic text face.	Quranic font directory	Community distribution entry; see the official portal for the current family.
KFGQPC KSA Heading	Kingdom series heading	Heading weight/style from the Kingdom series.	Quranic font directory	For titles and display; not a normal text body replacement.

2. Additional Quranic and regional font entries - part 2

Font name	Script / type	Purpose / description	Location	Notes
KFGQPC Dot Font	Dotted teaching font	Dot-matrix/dotted teaching face for learning letter shapes.	Quranic font directory	Special-purpose teaching style, not for standard Mushaf text.
KFGQPC Kufi Extended	Kufi display	Extended Kufi style from the King Fahd collection.	Quran & Islamic font catalogue	Decorative/display use rather than continuous Quran text.
Quran karim 114	Quranic Arabic typeface	A Quranic font entry described as file-verified by the directory.	Quranic font directory	Check licence and glyph coverage in the downloaded file.
aboyassin - quran tshkel	Quranic tashkeel	A Quranic Arabic typeface listed for vowelled text.	Quranic font directory	Archive entry; licence undocumented.
Al Qalam Quran	Urdu / IndoPak Quran	Legacy Al-Qalam Quran font family entry.	Quranic font directory	Archive entry; licence undocumented. Verify Urdu glyphs and Quranic marks.
Al Qalam Quran 2	Urdu / IndoPak Quran	Second-generation Al-Qalam Quran font entry.	Quranic font directory	Archive entry; licence undocumented.
Al Qalam Quran 2A	Urdu / IndoPak Quran	Alternate Al-Qalam Quran 2 build.	Quranic font directory	Archive entry; licence undocumented.
Al Qalam Quran Majeed 2	Urdu / IndoPak Quran	Al-Qalam Quran Majeed legacy font entry.	Quranic font directory	Archive entry; licence undocumented.
Al Qalam Quran Majeed Web	Arabic / Quranic	Web-oriented Al-Qalam Quran Majeed entry.	Quranic font directory	Archive entry; licence undocumented.
Al-QuranAlKareem	Arabic / Quranic	Quranic font entry listed by the RTL Fonts directory.	Quranic font directory	Archive entry; licence undocumented.
Al Majeed Quranic Font	Arabic / Quranic	Quranic typeface entry in the directory corpus.	Quranic font directory	Archive entry; licence undocumented.
Arab Quran Islamic 140	Arabic / Quranic	Third-party Quranic typeface listing.	Font record	Directory notes that it does not host the binary; publisher terms/licence are not stated.

3. Page-glyph systems and supporting fonts

Use this section when the goal is to reproduce a printed Mushaf page, not simply typeset Quran text in a font. Quran Foundation documents the QCF data fields and page-specific files. The QPC community repository documents the names QCF_PNNN and QCF_BSML.

Font name	Script / type	Purpose / description	Location	Notes
QCF V1 (604 page fonts)	Page-glyph; Madani 1405H era	Each page has a matching font file (p001-p604); requires Quran text encoded to QCF V1 glyphs.	Quran Foundation guide · QPC repository	Not a normal install-and-type Unicode font. Match the right page number and code_v1 text.
QCF V2 (604 page fonts)	Page-glyph; Madani 1421H	Modern Madani page-by-page system intended for highly faithful printed Mushaf layout.	Quran Foundation guide · QPC repository	Requires code_v2 and page_number. Good for exact page composition.
QCF V4 Tajweed (604 page fonts)	Page-glyph; colour Tajweed	V4 page fonts carry embedded colour treatment for Tajweed rules.	Quran Foundation guide	Requires matching code_v2/text data and colour-font support; COLRv1 and OT-SVG formats are offered.
Digital Khatt V1	Unicode; parametric Uthmanic	Early Digital Khatt Quran font with hand-calligraphic baseline.	Font download page	SIL OFL according to the download page; Unicode text, no per-page glyph map.
Digital Khatt V2 (KFGQPC V2, 1421H)	Unicode; parametric Uthmanic	Open-licensed reworking of the Madani V2 Mushaf style, Unicode-based.	Font download page	OFL 1.1; designed to match the 1421H KFGQPC layout.
QCF_BSML / Bismillah ligature	Supplementary glyph font	A dedicated Bismillah ligature used with the QPC glyph-font system.	QPC repository	Supplementary asset, not a full text font.
QPC Arabic Symbols 01	Supplementary symbols	Symbols font associated with the QPC collection.	QPC repository	For Quranic symbols/markers; use with the matching text and font setup.
Surah Names font	Supplementary headings	Special font used for surah-name headings in Quran Foundation rendering.	Quran Foundation font guide	A helper font for headings, not an Arabic text replacement.

How the QCF page-font sets are addressed

QCF V1: https://verses.quran.foundation/fonts/quran/hafs/v1/woff2/p{PAGE}.woff2
QCF V2: https://verses.quran.foundation/fonts/quran/hafs/v2/woff2/p{PAGE}.woff2
QCF V4 colour: https://verses.quran.foundation/fonts/quran/hafs/v4/colrv1/woff2/p{PAGE}.woff2
Replace {PAGE} with the relevant page number from 1 to 604. The actual integration also needs the matching Quran glyph data; see source [2].

Important: a font family name and a Quran text edition are not interchangeable. For example, Quran Foundation specifies that its IndoPak Nastaleeq word text must be paired with the compatible `indopak-nastaleeq-waqf-lazim-v4.2.1` file; other Nastaleeq fonts can fail to render waqf signs and verse-end markers correctly.

4. King Fahd Complex - wider computer-font collection

The official King Fahd Glorious Quran Printing Complex portal lists a broader set of computer fonts. The table below records the 18 styles visible in that collection. Several are Arabic display, teaching or regional-script fonts rather than fonts intended for continuous Quran body text.

Official font style	Purpose / family	Location	Notes
Naskh - Regular	Arabic text / Naskh	Official KFGQPC portal	Regular weight.
Naskh - Bold	Arabic text / Naskh	Official KFGQPC portal	Bold weight.
Naskh - Outline	Outline display	Official KFGQPC portal	Display/educational use.
Kufi - Regular	Kufi display	Official KFGQPC portal	The Complex describes more than 800 forms and 10 stylistic alternates.
Kufi - Extended	Extended Kufi	Official KFGQPC portal	Display/editorial use.
Kingdom - Regular	Modern Arabic text/display	Official KFGQPC portal	Five family styles are listed by the Complex.
Kingdom - Bold	Modern Arabic display	Official KFGQPC portal	Use for stronger headings.
Kingdom - Extra Bold	Modern Arabic display	Official KFGQPC portal	Display use.
Kingdom - Heavy	Modern Arabic display	Official KFGQPC portal	Display use.
Kingdom - Heading	Arabic headings	Official KFGQPC portal	For large headlines.
Screens & Smart Devices	Screen-optimised Arabic	Official KFGQPC portal	Four styles are described by the Complex.
Sindhi - Regular	Sindhi / Arabic script	Official KFGQPC portal	For Sindhi-language material.
Sindhi - Bold	Sindhi / Arabic script	Official KFGQPC portal	For Sindhi-language material.
Decorative - Regular	Arabic decorative	Official KFGQPC portal	Not for Quran body text.
Decorative - Outline	Arabic decorative outline	Official KFGQPC portal	Not for Quran body text.
Decorative - Filled Bold	Arabic decorative bold	Official KFGQPC portal	Not for Quran body text.
Jalil - Dotted	Calligraphic / dotted	Official KFGQPC portal	Decorative or teaching use.
Jalil - Undotted	Calligraphic	Official KFGQPC portal	Decorative use.

The official portal also presents Quran readings/riwayat fonts and separate pages for Hafs, Warsh, Qalun, al-Duri, al-Susi and Shu'bah, as well as a Hafs Nastaleeq font. Availability and exact downloads may change as the Complex updates its website. Use the portal’s computer-font library and its Madinah Mushaf publishing programme as the first-party locations.

Open the official font library | Open the official Madinah Mushaf desktop-publishing page

5. Selection and compatibility guide

Need	Start with	Why / caution
Ordinary Quran text in an app or document	KFGQPC Uthmanic Hafs Unicode (V18)	One Unicode font file; easiest integration. Make sure the text uses the matching Uthmani/Hafs text field.
Madinah Mushaf page should match line-for-line	QCF V2	Page-glyph set; requires the matching glyph-coded Quran text and page mapping.
Tajweed colours embedded in the glyphs	QCF V4	Use the V4 glyph data and a compatible OpenType colour font engine.
South Asian / IndoPak reading tradition	IndoPak Nastaleeq v4.2.1 compatible build	Pair with the exact text edition. Generic Urdu Nastaleeq is not a drop-in replacement.
Open-licensed modern Unicode Uthmanic option	Digital Khatt V2	OFL 1.1; Unicode text font designed to match the KFGQPC V2 layout.
Traditional Naskh typography for editorial work	Amiri Quran / Amiri	Open Font License; test Quranic marks and line breaks in the target application.
West African Arabic-script material / Warsh style	Harmattan; review Warsh-specific regional sources	Harmattan is designed in a Warsh style for West African Arabic-script languages; not a Madani page replica.
Broad Arabic Unicode coverage	Scheherazade New	Strong Unicode coverage, but general-purpose rather than a fully faithful Mushaf face.
Legacy Quran software / Urdu desktop publishing	PDMS Saleem Quran or Al-Qalam entries	Check exact app compatibility, keyboard mapping and licence before production use.

Before using a font in a published Quran

1. Confirm the riwaya (for example, Hafs or Warsh) and script tradition you need.
2. Verify the Quran text source against a trusted Mushaf; a font does not validate the text itself.
3. Test harakat, dagger alif, pause/waqf signs, sajdah marks, verse numbers and surah headings in the actual target application.
4. For QCF page fonts, pair the exact page file with its matching glyph text and layout metadata.
5. Read the licence from the original publisher or included README. An online directory entry is not itself a licence grant.

Licence caution

The safest starting points for open use are projects whose own pages explicitly publish an open-font licence, such as Amiri, Harmattan, Scheherazade New and Digital Khatt V2. Some older Urdu/Quran font entries are marked as having undocumented licences; do not assume that “free download” means permission for commercial use or redistribution. The King Fahd Complex/community mirrors should be checked against their included terms and original source.

6. Source locations and further browsing

All locations below are clickable. They are the most useful starting points for obtaining the current binaries, checking version information, viewing live specimens and confirming licence terms.

[1] King Fahd Glorious Quran Printing Complex - computer fonts collection
Official source for the Complex font families and downloadable Arabic/Quran-related styles.
https://fonts.qurancomplex.gov.sa/

[2] Quran Foundation - integrating Quran font rendering
Technical documentation for QCF V1/V2/V4, QPC Hafs Unicode, IndoPak Nastaleeq and font file paths.
https://api-docs.quran.foundation/docs/tutorials/fonts/font-rendering/

[3] Quran Foundation font CDN
Base location for hosted font assets; see the documentation for exact version/page paths.
https://verses.quran.foundation/fonts/quran/

[4] QPC Fonts repository (community-maintained mirror)
Includes Uthman Naskh, bold, Hafs, symbol font and QCF page-font references.
https://github.com/nuqayah/qpc-fonts

[5] Quran Fonts interactive catalogue
27-font catalogue with live preview, downloads, scripts and Mushaf layouts.
https://fonts.quran.ws/fonts/

[6] RTL Fonts - Quranic fonts directory
49 Quranic typeface entries; some are archived and have unclear licence status.
https://rtlfonts.com/type/quranic

[7] RTL Fonts - Quran & Islamic fonts
23 Quran/Islamic-related entries, including Quranic text faces and decorative styles.
https://rtlfonts.com/tag/quran

[8] Tanzil - Quranic fonts
Lists KFGQPC Hafs, Uthman Taha Naskh, Scheherazade, me_quran and PDMS Saleem.

[18] King Fahd Complex - Madinah Mushaf desktop publishing
Official publishing programme supporting Hafs and Warsh Mushaf fonts.
https://nashr.qurancomplex.gov.sa/en/

Research method and limitations

The catalogue cross-checks the official King Fahd Complex font portal, Quran Foundation font-integration documentation, the QPC community repository, Quran Fonts, RTL Fonts, Tanzil, SIL, Alif Type and Pakdata. The specialist directories are dynamic and include both current files and archive entries. Some names refer to a family, some to a weight/revision, some to a recitation-specific build, and QCF V1/V2/V4 refer to page-font systems rather than one downloadable TTF. Duplicates and close variants have been grouped where practical. This survey is an index to sources, not a certification of the Quranic correctness or licensing of every third-party font.

End of survey
